

You Decide Your Reproductive Destiny

Connect with us:

Annual Report 2026

With so many urgent concerns competing for your attention, why should DKT matter to you this year?

DKT International remains steadfast in what we believe is essential: ensuring that all people have access to high-quality, affordable contraceptives and health products so they can live their reproductive lives on their own terms. It may sound like a basic freedom – but today it is under attack, underfunded, and too often overlooked.

DKT is rising to these challenges. **Our work empowers tens of millions of women and men to decide when and whether to have children.** There are few decisions in life that are more intimate or consequential. Collectively, those choices shape families, communities, economies, and even geopolitics.

And DKT's impact is happening at scale. In 2025, we delivered 70 million Couple Years of Protection (CYPs), making us one of the largest reproductive health service providers in the world. In the pages ahead and on our website, you will find detailed information about the products we delivered and the health impact achieved.

But our work is not just about numbers. **It is about individuals – about decisions that change lives** and shape the trajectory of education, work, and family, often in ways never fully seen. These stories inspire us and reaffirm why access to reproductive health choices must remain universal.

Your support to DKT makes a difference. Because of donors like you, DKT reaches some of the most underserved communities and populations worldwide. Combined with DKT's earned revenues, your partnership is part of a long-term sustainability strategy that enables DKT to navigate future uncertainties, including shifts in philanthropy, technology, and geopolitics. We are preparing today to ensure that this work endures for decades to come.

Thank you to our business and programmatic partners, our donors, and especially the thousands of DKT staff who bring enthusiasm, determination, and tenacity to this mission every day. We invite you to continue moving forward with us.

Christopher Purdy
President and CEO

DKT's work supports freedom

At its core, reproductive health is about freedom: the freedom to choose one's future, exercise bodily autonomy, and live with dignity. DKT's vision, a world where every child is wanted, the sex is great, and people are free, reflects our belief that informed choice is the foundation of lasting impact. **By building sustainable markets, we make reproductive health products affordable and accessible,** expanding access while respecting individual agency and reproductive autonomy. In a world of growing uncertainty, DKT helps empower people to define and choose the families they want.

**DKT invested \$147 million
in commodity procurement
in 2025***

More than 90% of DKT's commodity procurement is financed by DKT's own sales revenues. This allows DKT to most effectively leverage donor support to reach the last mile and advance our health equity goals, ensuring clients across income levels can afford high-quality products.

* 2025 procurement values are an estimate based on preliminary data. Values from prior years reflect audited financials.

DKT's Affiliates

DKT's affiliates support our mission of empowering individuals with the freedom to choose around the world, on and offline.

Founded in 2015, **Women First Digital (WFD)** is a global femtech organization that leverages digital innovation to ensure women everywhere can access accurate, confidential, and compassionate abortion and contraceptive care. Our digital solutions, available in multiple languages, support equitable and accessible pathways for self-managed abortion and contraception, overcoming cost, stigma, and distance to put power and choice in people's hands

carafem expands access to abortion care and family planning through compassionate in-office and telehealth services—including abortion pills by mail—across 20 states and the District of Columbia. Our 24/7 medically supported virtual care companion, Cara, accompanies and supports people throughout their at-home abortion experience with trusted information and helpful reminders.

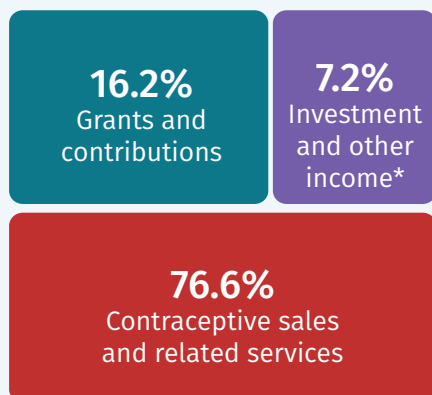

DKT WomanCare is a leading supplier of reproductive health products, marketing and distributing Levoplant contraceptive implants, Ipas manual vacuum aspiration (MVA) technology, contraceptive injections, emergency contraceptive pills, oral contraception, intrauterine devices, and medical abortion pills across 100 countries. DKT WomanCare is the legal manufacturer of the Ipas MVA kit technology and works closely with global procurement agencies, governments, NGO partners, and commercial distributors to expand access to high-quality reproductive health products.
